

ADMINISTRATIVE - INTERNAL USE ONLY

16 September 1983

Tom Cormack
Executive Secretary

History Staff Bi-Weekly

Ken has spent much of his time on the issue of OSS documents and their release to the National Archives. He has met with Archives officials and with a number of Agency people from Information Management, Records Management, and OGC. He has additional meetings scheduled through early next week, after which he will prepare a report. Ken has also received a phone call from an external researcher in this field, Paul Rosa, and a follow-up letter from Rosa confirming the telecon.

Ken spoke at the National War College on 8 September on Admiral Mahan.

No new oral history interviews have been conducted, but the transcripts [] and Ken's interviews with John Warner were checked out with him.

STAT

[] began her annual leave today and is due back on 11 October. Most of the time she will be traveling in Germany. Before departing, she attended a one-day Records Management Course and conducted a classification tabulation project for DDA/IMS/RMD. Our tabulation was negative -- we did not initiate any classified material during the period of the project. [] also conducted a concerted effort to get back overdue histories out on loan; three have been returned and two are still out, including the McCone study loaned to, the DCI.

STAT

[] was visited by [], who had received an FOIA request from the Center for National Security Studies [] and wanted some background. She gave him a short oral briefing on the subject.

STAT

STAT

STAT

[] has been inundated with packages of documents selected by State historians at the JFK Library. She is processing them for review by the originating Agency components.
